TV Service Providers Deliver The Worst Experience

In The 2011 Temkin Experience Ratings, we examined the customer experience across 12 industries. For this post, we will take a closer look at the six wireless carriers in the ratings.

TV service providers have an average rating of "Very Poor" and was the lowest ranked industry...

Let's take closer look at the results for all of the individual wireless carriers...
As you can see, Cox Communications leads the TV service providers, but only receives a "poor" rating. Three firms end with "very poor" ratings: Comcast, Charter Communications, and AT&T.

The ratings are based on a survey of 6,000 US consumers who provided feedback on the following three elements of their experience with companies:

- **Functional**: How well do experiences meet consumers’ needs?
- **Accessible**: How easy is it for consumers to do what they want to do?
- **Emotional**: How do consumers feel about the experiences?

Let's take a look at the three components of the Temkin Experience Ratings...
Cox Communication is the top-performing TV service provider when it comes to functional experience. It is also at the top of the accessible and emotional components along with Cablevision. Comcast and Charter Communications fall well below the rest of the industry in the accessible and emotional components of experience.

The bottom line: TV service providers need a customer experience overhaul
About Temkin Ratings

Temkin Ratings is an offering of Temkin Group. The site provides access to data on how consumers rate their experiences with more than 100 companies and the associated loyalty of those consumers. The data can help organizations benchmark themselves within their industry and compare themselves to companies across other industries. The breakdown of data in consumer segments (age, income, education, gender, and ethnicity) provides companies with a deeper understanding of the link between customer experience and loyalty for their customers.

About Temkin Group

Temkin Group is a customer experience research and consulting firm. We have one simple goal for our clients: increase customer loyalty by becoming more customer-centric. Any company can improve portions of its customer experience, but it takes more than a few superficial changes to create lasting differentiation. The Temkin Group combines customer experience thought leadership with a deep understanding of the dynamics of large organizations to help senior executives accelerate their customer experience results.

The company was founded based on four core beliefs:

**Customer experience drives loyalty.**
Our research and work with clients has shown that interactions with customers influence how much business they’ll do with you in the future and how often they recommend you to friends and colleagues.

**Improvement requires systemic change.**
Companies can improve isolated customer interactions, but they can’t gain competitive advantage until customer experience is embedded in their operating fabric.

**It’s a journey, not a project.**
Building the capabilities to consistently delight customers doesn’t happen overnight. Companies need to plan for a multi-year corporate change program.

**We can help you make a difference.**
Transformation isn’t easy, but leading your company to be more customer-centric is worth the effort. We help our clients accelerate their results and avoid many of the bumps along the way.

Temkin Group combines customer experience thought leadership with a deep understanding of the dynamics of large organizations to accelerate results.

We help firms build four competencies required for long-term success:

1. **Purposeful Leadership.** Does your executive team operate consistently from a clear, well-articulated set of values?
2. **Engaged Employees.** Are employees fully committed to the goals of your organization?
3. **Compelling Brand Values.** Are your brand attributes driving decisions about how you treat customers?
4. **Customer-connectness.** Is customer feedback and insight deeply integrated throughout all of your internal processes?
